WSDB Euclid ERO

This is the merged catalogue of VIS and YJH catalogues for Euclid ERO data.

The merge was done using VIS catalogue and then picking up the nearest neighbor in the YJH catalogue

The table is euclid_ero.merge_cat

```
                Table "euclid_ero.merge_cat"
         Column           |       Type       | Collation | Nullable | Default
--------------------------+------------------+-----------+----------+---------
v_number                  | bigint           |           |          |
v_x_image                 | double precision |           |          |
v_y_image                 | double precision |           |          |
v_id_parent               | bigint           |           |          |
v_ext_number              | bigint           |           |          |
v_flux_iso                | double precision |           |          |
v_fluxerr_iso             | double precision |           |          |
v_mag_iso                 | double precision |           |          |
v_magerr_iso              | double precision |           |          |
v_flux_isocor             | double precision |           |          |
v_fluxerr_isocor          | double precision |           |          |
v_mag_isocor              | double precision |           |          |
v_magerr_isocor           | double precision |           |          |
v_flux_aper1              | double precision |           |          |
v_flux_aper2              | double precision |           |          |
v_flux_aper3              | double precision |           |          |
v_flux_aper4              | double precision |           |          |
v_flux_aper5              | double precision |           |          |
v_flux_aper6              | double precision |           |          |
v_flux_aper7              | double precision |           |          |
v_flux_aper8              | double precision |           |          |
v_flux_aper9              | double precision |           |          |
v_flux_aper10             | double precision |           |          |
v_fluxerr_aper1           | double precision |           |          |
```
